DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

2. Claims 1, 2, 4, 6, 7, 11, 12 and 51 to 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese 3-221369 (Miyamoto hereafter).

In Figure 2 it is seen that second roll head 5 is guided for reciprocation in arm 2 by bearing surface 4 with actuation by cylinder 6.

Claim Rejections - 35 USC § 103

3. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyamoto.

The specific bearing surface or actuation means employed in Miyamoto, as recited in these claims, is considered to be an obvious exercise of mechanical design to one skilled in the art, and not a patentable distinction absent a disclosure of criticality in the solution of stated problems with the use of particular such means.

Drawings

4. Figure 5B, listed in the brief description of the drawings, is not found in any of the drawings filed in this application.

Conclusion

5. Claims 8 to 10 and 54 to 59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
